
EXPLORER 510

The EXPLORER 510 operates on the Inmarsat BGAN service to deliver voice and broadband services on a near global basis.

The durable magnesium casing and a dust and water resistant design makes the EXPLORER 510 the perfect choice when working off the beaten track, but still dependant on a reliable connection.

Portable performance

Smaller than a standard laptop and weighing less than 1.4 kg, this satellite terminal is easy to carry along when travelling the world.

It supports your need for performance and provides simultaneous high quality voice and broadband access at speeds up to 464 kbps.

Connect the optional EXPLORER LTE Modem to the USB port and turn your device into a true communication SmartHub. Use local cellular net when available and BGAN when no other option is available.

Satellite connectivity made simple

EXPLORER 510 is easy to set-up and to operate. The user interface is intuitive and can be accessed from your PC or any kind of smart device.

With the EXPLORER Connect App you can use your smart device to make calls or easily access the internet even in areas with no terrestrial or cellular coverage. The EXPLORER Connect App with a SIP softphone will be available on Android and IOS.

Specifications

| | |
|--------------------------|--------------------------------------|
| Bandwidth (Rx/Tx) | 464/464 kbps |
| Streaming IP | 32, 64 & 128 kbps |
| ISDN | No |
| Ethernet | Yes - via converter cable (included) |
| 2-wire | No |
| Bluetooth | No |
| WLAN | Yes - IEEE 802.11 b/g/n |
| External Antenna | No |
| Battery | Li-On - |
| Weight | 1.4kg / 3.1lbs |
| Size (H x W x D) | 202mm x 202mm x 51.8mm |
| IP Grade | IP66 |
