

Inmarsat IsatPhone 2

The IsatPhone 2 is the latest addition to Inmarsat's hand held satellite phone portfolio. Incorporating many new high-quality communication capabilities.

The handset now incorporates the ability to receive incoming calls alerts with the antenna stowed, and comes with a purpose built holster. A new tracking service has also been incorporated into this improved design.

Overview

The Inmarsat IsatPhone 2 satellite phone system incorporates many new high quality communication capabilities that make it extremely rugged, reliable and flexible.

A dedicated button (with LED icon) will send information via text message to a predetermined number/e-mail address and also can be programmed to send location information at set intervals.

The new handset has a built-in magnetometer which is displayed if the initial search for an Inmarsat satellite fails, allowing the user to re-position the phone, adding to the positive user experience.

Reliable Network

IsatPhone 2 operates over the Inmarsat-4 network, with its record of 99.9 per cent satellite & ground network availability.

Features

- High quality voice
- Supports Bluetooth
- Compact and portable
- Intuitive GSM style interface
- Gorilla glass & large keypad
- Assistance (SOS) button
- GPS tracking
- Dust and splash resistant (IP65)

“IsatPhone 2 is the latest addition to our hand held satellite phone portfolio with a range of additional features that help you to stay connected in the most extreme and remote locations.”

Inmarsat
