## Iridium 9555

---

The Iridium 9555 is not only small but it is also powerful, dependable and rugged.

With a significantly reduced footprint from Iridium's previous phones, more hand-friendly form factor, and streamlined features such as an internally stowed antenna, this sleek handset is designed with portability in mind.

### Overview

The Iridium 9555 is designed to work everywhere, without exception. It is engineered to withstand the world's toughest environments, so it acts as a critical lifeline whenever and wherever.

The Iridium 9555 incorporates an integrated speakerphone, SMS and e-mail messaging capabilities, as well as a Mini-USB data port.

The handset also features an amazing, intuitive user interface – making reliable communication more efficient than ever.

You can start making calls right out of the box, skipping the traditional learning curve, and maybe even the need for a user manual.

### Global Coverage

Iridium's satellite service offers gap-free, pole-to-pole coverage. Iridium's constellation of 66 low-earth orbiting, cross-linked satellites provides critical voice and data services for all regions.

Voice and data are routed among the satellites without touching the ground, creating a highly secure and reliable connection.

### Features

- High quality voice
- Compact and portable
- Headset and handsfree capability
- Engineered to withstand rugged environments

*“The Iridium 9555 is the evolution of trusted, reliable mobile communications and it is connected to the only truly global mobile communications network.”*

*Iridium*

## Specifications

---

**Dimensions** 143 mm (L) x 55 mm (W) x 30 mm (D)
