

Iridium Direct Internet 3

AST advise all Iridium 9505 and 9555 series handset users that Direct Internet 3 is now available from: <http://www.astextranet.com/ASTFileRetrieval.aspx?key=abe85017-45d9-4d2d-b831-e84bed1fd3f1>

What Direct Internet 3 Does

Direct Internet 3 uses the SlipStream SP6.0 with Now! imaging compression technology to deliver an enhanced Internet connectivity experience. Direct Internet 3 also supports the Windows XP, Windows Vista, Windows 7 and Mac OS operating systems. The new Direct Internet 3 installer guides users step-by-step through the entire installation and configuration of the software.

Direct Internet 3 operates with Iridium data capable products including: the [Iridium 9522B satellite transceiver](#); the [Iridium 9505 handset](#); and the [Iridium 9555 handset](#).

Installing Direct Internet 3

Iridium 9555 satellite phone users must first install the Iridium 9555 USB (VCOMPORT) driver BEFORE installing Direct Internet 3 on computers with the Windows operating system. Computers using the Mac OS operating system do not require the Iridium 9555 USB driver installation

If you have any questions or have issues downloading the firmware, please contact AST Customer Service on:
